Thinking the flaming oil might catch fire, the firemen and employees from establishments near the fire dug trenches which led to the city sewers.

Several firemen and spectators were hurt. A score of dwellings on Water Street and Dudley Street were endangered. Cans, crockery, removed from the household goods and then were kept out of the district by the police.

SWAY OF TEMPERANCE POTENT IN SWEDEN

Various "Dry" Societies Form Most Powerful Political Organization.

BY LA MARQUEISE DE FONTENAY.

IS no country of the Old World do the temperance societies exercise so potent a sway as in Sweden. The various organizations form, indeed, perhaps the most powerful political force in the land, and the movement, therefore, which has now been started throughout that country, with a view to the enactment of legislation prohibiting the production, the importation and the sale of alcoholic liquors, and even of beer, is likely to be crowned with success. The government at Stockholm has within the last fortnight publicly announced through the Minister of State, Stauff, that if the movement receives the support of the people it will cordially endorse and champion the projected legislation, and that this will encounter no obstruction on the part of the reigning family is perhaps best shown by the fact that the Dowager Queen of Sweden has long been an ardent and enthusiastic supporter of the total abstinence agitation in the land, that her second and favorite son, Admiral Prince Oscar Bernadotte, is the president of the United Temperance Societies of Sweden, and that King Gustavus Adolphus himself, who is a total abstainer, feels so strongly about the matter that he has, since his father's death, got rid, at a loss, of the well-known brewer, who was owned by the late Oscar II., and which was a source of considerable revenue to his privy purse.

As for the national legislature at Stockholm, it has lately given a practical demonstration of its views about the matter, by doing away with all liquid refreshments of an alcoholic nature in the parliamentary restaurant and buffet.

The only problem which will confront the movement is how to surround the treaties of commerce with foreign nations authorizing the importation into Sweden of wines and liquors of one kind and another.

If this legislation succeeds—and there is no doubt of it—it will be the Swedish envoy to this country and the various consuls of King Gustavus Adolphus on this side of the Atlantic will have no alternative but to take a leaf out of the book of the American Secretary of State, William J. Bryan, and restrict themselves to unfettered grape juice, in lieu of champagne, and that delicious Swedish arrack punch.

Prince Gregory Troubetzkoi, chief of the Near East Division of the Department of Foreign Affairs in St. Petersburg, and formerly counselor of the czar's embassy, and his charge d'affaires at Berlin, has just published one of the leading German newspapers, namely, the Hamburg News, a remarkable letter over his signature, in which he sets forth that Russia is far more interested in remaining on friendly terms with Germany than with England, and that the Russian government with Germany are greatly superior to those with Great Britain, and on the strength of the official statistics which he cites, intimates that Russia could never afford to form any alliance with England that was in any way inimical to Germany.

It stands to reason that the prince would not have dared to write thus over his signature without due authority from his government and from the Russian emperor. But, admitting this, one may be tempted to ask, what has become of the triple entente between Russia, Great Britain and France, which had been organized with so much care by Edward VII., to counterbalance the triple alliance, constituted by Germany, Austria and Italy? The fact that these two coalitions of great powers of Europe were so evenly balanced was regarded as constituting an important guarantee of peace.

If the triple entente has ceased to exist, by the defection of Russia, the situation has, indeed, undergone a remarkable change, which demands the attention of all careful students of European affairs.

Viscount Gage, who has applied to King George to terminate in his favor the abeyance of the ancient baronies of Dynant, Martin and Fitzwarren, has completed as a minor, after years of age, to present his petition through his mother, the widowed Lady Gage, who is his guardian, has a strain of American blood in his veins. For one of his forebears was governor and commander-in-chief of the British forces in America
